PRODUCT INFORMATION AND APPLICATION USE:

Niron AllPro preinsulated fittings are manufactured with Niron Clima PP-RCT carrier components that are housed within an IPS Sch. 40 jacket that is extruded with a 30 year U.V. resistant white PP-RCT external layer. The fittings are super insulated with highly efficient closed cell polyurethane foam (PUF) insulation which exceeds the required thickness for the ASHRAE 90.1 Energy Code in all sizes. This style of fitting has carrier pipes extended to allow joining by the AllPro EF or BF method. Each fitting is available in an optional "extended version" which has the centerline-to-end dimension of the fittings extended to allow for clamping in butt fusion machines which have a wide clamp set-up.
